AI-Powered Amazon Research

AmazenLens

Find winning products before your competitors do.

$45B	10M+	$19/mo
Global TAM	Amazon Sellers	Starting Price

Istanbul, Turkey · 2025 · Pre-Seed Round · gokhan@amazenlens.com

THE PROBLEM

Amazon sellers are flying blind.

Millions of sellers research products manually, wasting weeks — only to launch into saturated niches with no profit left.

⏱️ 40+ hours/week

Manually researching products across dozens of spreadsheets and tabs

💸 70% failure rate

Most new Amazon listings fail within 6 months due to poor niche selection

🌍 No Turkey-specific tools

Existing tools ignore Turkish sellers, Trendyol arbitrage & local suppliers

📊 Data fragmentation

Sellers juggle 5+ tools — Helium10, Jungle Scout, Keepa, Alibaba, Trendyol

THE SOLUTION

One platform. Every insight.

AmazenLens Dashboard

Niche Score

78 / 100

Monthly Sales	Profit Margin
1,240 units	64%

Hiring: Frontend Dev · QA Engineer · Customer Success (Post-funding)

WHY NOW

The timing has never been better.

Amazon Turkey launch 2024

Amazon.com.tr launched — millions of Turkish sellers now have a direct Amazon pathway, but zero research tools in Turkish.

AI-native product research

Claude, GPT-4, and LLMs make intelligent niche commentary and scoring possible for the first time at SaaS price points.

Turkish e-export boom

Turkey's e-export volume grew 2.3x in 3 years. ETID and TÜBİTAK BiGG are actively funding tools in this space.

Competitor price increase

Helium 10 raised prices 40% in 2024. Thousands of sellers are actively looking for alternatives right now.

TikTok commerce surge

TikTok Shop drove $20B GMV in 2024. Amazon sellers need trend detection tools that include social signals — none exist today.

First-mover in TR market

No dedicated Turkish Amazon research tool exists. 500K+ Turkish Amazon sellers have zero native-language alternative.

THE ASK

We're raising $200K Pre-Seed.

$200,000

Pre-Seed Round · SAFE Note

Use of funds:

Product & Engineering	$150K
Marketing & Growth	$30K
Operations & Legal	$20K

With this capital we will:

- 🚀 Launch AmazenLens publicly (Phase 1)
- 👥 Hire 3 key engineers (backend, frontend, AI)
- 📈 Reach 500 paying users in 6 months
- 🌍 Expand to 6 languages & 10 markets
- 💰 $10K MRR within 9 months
- 🏆 TÜBİTAK BiGG 1512 grant (₺3.48M)

MOAT & RISK

Defensible advantages. Eyes-open risks.

Our moat

First-mover advantage

No Turkish-language Amazon research tool exists

Proprietary niche algorithm

100-point scoring with Gini coefficient + RVI logic

Trend Radar (unique signal fusion)

TikTok + Google Trends + BSR — competitors don't have this

Turkish supplier network

KobiVadisi, Bilvio.com, Kolay İhracat integrations

Data moat over time

User behavior + anonymized niche scores improve AI predictions

Known risks

Amazon ToS changes

Mitigation: API-based stack (Rainforest, SP-API), no direct scraping

Big competitor copies us

Mitigation: Turkish market speed advantage + 18-month feature lead

Exchange rate risk (TRY)

Mitigation: USD-denominated pricing, Stripe/Paddle multi-currency

API cost escalation

Mitigation: Redis caching reduces API calls by 70%; Keepa fixed-cost

Low conversion on free tier

Mitigation: Feature-gated free plan, aggressive onboarding email series

Let's find winning products.

Together.

AmazenLens is looking for its first investor partners who believe that every Amazon seller deserves world-class research tools.
